

## AMEDA HYGIENIKIT PLUS

The Sterile Dual HygieniKit® PLUS Kits combine the proven HygieniKit System with the convenience of the Ameda MiniFil 80ml and 50ml containers. These kits are the perfect solution for pumping moms who are in the early stages of establishing their milk supply and for those who are pumping for babies in the NICU.

The Ameda HygieniKit diaphragm was tested for its ability to act as a barrier to viral and bacterial penetration by an independent lab study.

- 1 The results of the test proved the viral barrier protected breast milk from potential **viruses** like:
  - Hepatitis B • Hepatitis A • HIV • CMV • Phi-X174 — the smallest known virus
- 2 The barrier also protects against **bacteria** like:
  - Staphylococcus aureus • Streptococcus pneumoniae
  - Pseudomonas aeruginosa • E-coli
- 3 Prevents moisture from entering tubing —eliminating risk of dangerous **mold** growth

### KEY FEATURES:

- Compatible with all Ameda breast pumps
- Contains Sterile Dual HygieniKit system (25mm) and (2) 50ml (2) 80ml minifil containers and lids
- Minifil containers 50 ml and 80 ml also available in packages of 20
