

## NEW AND IMPROVED AMEDA PUMPEASE

The Ameda PumpEase Hands-Free Pumping Bra is similar to the design we know and love, but with a few changes to provide more coverage and better support. It still offers superior fit and comfort, and uses the same highly technical fabric that won't bag or stretch even after multiple washes. It fits all makes of breast flanges.

The Ameda PumpEase holds breast pump flanges securely in place, so moms can pump hands-free. Suction is maintained due to the technical nature of the fabric holding the flanges snug. PumpEase is easy to use and is a great tool to make life easier for pumping moms.

### KEY FEATURES

Patented 'no-stitch', no rub openings that accommodate ALL breast pump flanges

88% high-count polyester, 12% spandex microfiber jersey knit

Secure fit with elastic back and 3-position hook and eye closure

New curved design provides more coverage in the breast area

Durable, machine washable and antibacterial technical fabric

Soft, stretchy, breathable fabric will not fade or lose shape

Available in sizes 1-4, bust measurements 32-48"

### HOW TO FIT YOUR AMEDA PUMPEASE HANDS FREE PUMPING BRA:

1. Measure in last month of pregnancy or after 2-weeks post-partum for best fit.
2. Measure around the fullest part of your bustline with the tape measure running under your arms—the tape should be snug, but not constricting. Make sure the tape is not sagging at the back and it is parallel to the floor.

Size	Order #	UPC
1: 32-36	500M05	810725025734
2: 36-40	500M06	810725025741
3: 40-44	500M07	810725025758
4: 44-48	500M08	810725025765

NOTE: Measurement for bra size is determined by bust measurement and not by cup size. On the edge of 2 sizes? If you are C cup or more, size down. (A larger cup size means there is a bigger difference between your under-bust (band size) and bust measurement. Sizing down ensures the bra sits snugly under your bust for better support. Size the band not the cup) If you are less than a C cup, size up.
