Mothers Choice Products is proud to support breastfeeding families.

We have always followed the WHO code and support the Baby Friendly Initiative and as such our products and partners reflect that commitment.

Mothers Choice Products has been one of the leading distributors of maternal health products in Canada for 30 years. We have carefully built relationships with retailers and the medical community based on trust and confidence. Our ability to maintain our supply chain is second to none, and we put our customers first in every decision we make. Premium products, excellent service and minimum orders that fit every size customer makes us a great partner for your institution.

Mothers Choice Products has offices and a warehouse facility located in Richmond, BC with territory managers located across Canada. Our customer service is available by phone in both French and English and we strive to answer your emails and inquiries the same day or the next business day.

We know you need products that moms and health care professionals trust at a price that works. We have the products and knowledge to help you do that, and we can work with each institution to find the best solution for your needs.

Our commitment to provide products and services to hospitals and health units as well as independent retailers and large chain stores has made us unique in this industry. We aim to make essential products for new and expecting parents available to the widest possible audience. All products we represent are of the highest quality and provide relevant added value to parents and their babies. Every day we strive to be the most credible and knowledgeable distributor of pre-natal and post-natal products in Canada, delivering excellent and consistent service.

Trusted by Hospitals, Loved by Moms.

Solutions From Hospital to Home

The Ameda mission is to support moms throughout their breastfeeding journey with safe, trusted and accessible products. Ameda’s clinically-based solutions include the Platinum multi-user breast pump, the new Pearl multi-user pump, the Universal HygieniKit collection kit and Penguin Nutritional Warmer. Ameda is in the hospital ensuring moms get started with products that are trusted by clinicians and lactation experts.

As moms transition home to begin life with their babies, Ameda is there with a full range of favourites that include Mya Joy personal pumps, breast care items and breast milk collection and storage products. We recognize that each journey is unique, and we dedicate our efforts to providing safe, protective, and proven solutions and support for all moms. That’s the Ameda Difference.

Ameda is considered by many Canadian health care professionals to be the premier breast pump manufacturer in the world. More than 80 years ago, Swedish engineer Einar Egnell made it his life’s work to help breastfeeding moms. After years of research, Egnell created the first comfortable and effective breast pump that closely mimics the suckling rhythm of nursing infants. In the process, Egnell also created the vacuum and cycling standards that have since become the industry benchmark. With those 80 years of engineering know-how and proven success, millions of new mothers and their babies have benefited from Ameda breastfeeding pumps.

All Ameda breastfeeding products offer top quality, value and ease of use. Pair that with the safest kit on the market today and you have the perfect match for a mother’s breastfeeding journey.

Penguin Breast Milk Warming System

Universal Kits

What Ameda Offers:

Powerful:

Using technology based on 80 years of know-how, Ameda Pumps and nutritional warmers work as they should, when they should

Safe:

Closed system collection kit designed to protect mom and baby from contaminants

Portable:

Ameda has options for both stationary and on-the-go use via AC cable, rechargeable batteries and traditional alkaline batteries

Trusted:

80 years of dedication to providing the best and safest breast pumps to ensure the tiniest patients can have their best start

Quiet:

Pumps and nutritional warmers are designed to be quiet and under 45dB to protect the most vulnerable NICU patients from excess noise

Ameda® Pearl

Powerful, Durable Performance in the Hospital and Home

Pearl combines powerful performance inside with a protective shell on the outside. Pearl is designed to build milk supply amongst pump-dependent, late preterm and term moms. Pearl’s modern design combines the durability needed for the multi-user/hospital environment with lifestyle features moms expect. Pearl will serve the needs of hospitals and is the ideal multi-user product for rental depots. Pearl is perfectly positioned to support continuity of care in the hospital and home.

Highlights:

PORTABLE
Lightweight with rechargeable battery and integrated handle

COMFORTABLE
Fully customizable expression mode with 72 possible combinations of speed and suction settings

SMART
VacuSense Technology ensures consistent vacuum performance in varying altitudes or changing atmospheric conditions

DAY & NIGHT
Adjustable/dimmable nightlight for late night sessions

SAFE
Compatible with Ameda’s Universal HygieniKit, the only closed system pump kit proven via study to protect against contaminants like bacteria, viruses and mold growth

Ameda® Pearl

- Proven:** Over 90% of moms surveyed were highly satisfied with Pearl
- Powerful:** Hospital Grade / Multi-User Performance with two modes of pumping
- Portable:** Lightweight unit with rechargeable battery and integrated handle provides up to 3 hours of pumping time
- Smart:** VacuSense Technology ensures consistent vacuum performance in varying altitudes or changing atmospheric conditions
- Comfortable:** Fully customizable expression mode with 72 possible combinations of speed and suction settings
- Durable:** Protective housing designed for easy cleaning between users
- Whisper Quiet:** Discreet pumping anywhere

Includes:

- Pearl pump with rechargeable battery
- Hospital rated AC power cord
- Quick start guide
- Instructions for use

Key Features:

- Works with any Ameda HygieniKit, featuring the only patented viral barrier to protect breast milk
- 6 suction levels in stimulation mode and 12 in expression mode
- Large, backlit LCD display with timer
- Built-in memory and push button controls
- 2-minute auto switch to Expression Mode
- Integrated rechargeable battery
- Built-in bottle holders
- Adaptable for single or double pumping
- Compatible with CustomFit Flange System
- 3 year limited warranty

Ameda® Platinum Electric Breast Pump

Gold Standard for NICU

The Ameda Platinum is the only multi-user hospital breast pump to record milk volumes of more than 1,000 ml/day during a 14-day clinical study. The Platinum combines clinically proven performance with a highly durable design that is perfect for a multi-use hospital environment. The Ameda Platinum breast pump has been shown to be the most effective pump for building milk production and maintaining milk supply for all babies, including preterm and full-term infants.

Highlights:

PROVEN

Clinical data supports Platinum's ability to build milk supply among term and preterm infants

COMFORTABLE

Reciprocating internal piston delivers a smooth, comfortable feel, preferred by lactation professionals

SMART

VacuSense Technology ensures consistent vacuum performance in varying altitudes or changing atmospheric pressure

CUSTOMIZABLE

Independent speed and vacuum controls allow mothers to choose from 5,000 unique setting combinations

DURABLE

Protective housing designed for easy cleaning between users; 3-year limited warranty

SAFE

Compatible with Ameda's Universal HygieneKit closed system pump kit — proven to protect against contaminants like bacteria, viruses and mold growth

Ameda® Platinum Electric Breast Pump

The Ameda Platinum breast pump is clinically proven to be the most effective breast pump in establishing and maintaining milk production in hospital. Preterm and full-term infants can benefit from this technology. The Platinum uses a smooth, durable, internal rotating piston which creates a rhythmic waveform that is both comfortable and effective. Combine that with custom control, and you have the most effective pump on the market today.

Includes:

- Platinum pump
- Detachable hospital grade AC power cord
- Quick start guide
- Instructions for use

Key Features:

- Works with Ameda Universal HygieniKit kits (H-Series kits) featuring the only patented viral barrier to protect breast milk
- Built-in bottle holders secure collection bottles and milk bags
- Tested for durability in clinical settings
- Clear LCD display, backlit for low light
- Built-in timer
- Compatible with all Ameda HygieniKit collection systems
- Easy troubleshooting
- Clear indications if service required

Ameda® Penguin Nutritional Warming System

The Penguin Nutritional Warmer system ensures every feeding is delivered within the ideal physiological temperature range of 32°C to 38°C (97°F – 100°F). Ameda focuses on efficient warming and breast milk protection so you can focus on patient care and nutrition. The gentle vibration minimizes chances of potential loss of lipids and enzymes associated with improper shaking/rolling commonly used to even out hot spots.

Product Specifications:

- Accommodates all commonly used bottles and syringes including syringes over 60ml plus Volu-Feeds and breast milk storage bags
- Protects from hot spots with 360° surround warming to achieve mom's ideal body temperature range
- 3 modes are available:
 1. Warm mode (room or fridge temp to feeding temp)
 2. Frozen mode (frozen to feeding temp)
 3. Thaw mode (frozen to room temp)
- Gentle vibration mixes feeds throughout the warming cycle
- Dual Pouch Therma-Liner separates breast milk/feed from contact with water in a dry pouch surrounded by a sealed wet pouch
 - Eliminates environmental pathogens that can be introduced in a traditional water bath warming method
 - Blocks airborne environmental pathogens that can be introduced by fan blowing contaminants from the air
- Space saving feature of the 4 well warmer uses the same space as 3 individual units. Single warmer can also be attached to an IV pole for bedside usage
- The patented Therma-Liner only needs to be replaced once per shift or every 12 hours
- 2 year warranty — Best in class

What Penguin Offers:

Quiet:

Quietest warmer on the market at 35dB

Space Saving:

4 well, independent controls

Flexible:

From frozen to thaw to warm to feed - whatever you need it can deliver

Safe:

Patented technology to ensure feed is warmed to the optimal temperature every time. No hot spots

Nutritional Value:

Safely warm feedings to the thermo-neutral zone (32°C to 38°C) for optimal feeding every time

Single Well Warmer

Four Well Warmer

Ameda® Penguin Nutritional Warmer

Single Well Warmer

The Ameda Penguin warms based on temperature, not time and is designed to safely warm feedings to the thermo-neutral zone (32°C to 38°C). This is to protect 100% of the nutritional value of each feeding. The Ameda Penguin Nutritional Warmer ensures breast milk is always safely delivered within the ideal physiological temperature range regardless of the starting temperature. The temperature feedback technology ensures the safe and consistent warming of each feeding.

Four Well Warmer

The only multi-well warmer available on the market, it allows for efficient warming of multiple feedings simultaneously. The space-saving Ameda Penguin Nutritional Warmer has a footprint equivalent to 3 single well warmers. Each well is independently programmable and features multiple warming options.

Ameda® Penguin Nutritional Warmer Accessories

Penguin Therma Liner

The patented Therma-Liner achieves a protective closed-system by creating a solid barrier between the water and milk container. The proprietary “bag-in-bag” design isolates the milk container from an outer layer that contains water. The Therma-Liner ensures for a true 360°, multidirectional gentle warming for a more uniform and even warming/thawing process. It acts as a buffer between the heating element and feed, preventing any direct exposure to heat. The bag allows the Penguin system to leverage the thermal transfer properties of water — the most efficient and controlled method for heat exchange because water conducts heat superior to dry air. The use of this bag also allows the system to operate silently at 31dB (single well) and 35dB (four well) and is safe for bedside use.

The low, indirect heat provided by Therma-Liner bags helps maintain the unique nutritional and immunological qualities of breast milk and human milk fortifiers. The liners can be used for 12 hours, being replaced once each shift. They can be recycled.

Penguin Perch Shelf

The shelf creates convenient bedside usage for single well warmers. It is made of durable metal material and can be mounted on an IV pole. Includes clamp for attachment.

Ameda® HygieniKit Milk Collection System

Ameda's Closed System Equals Safe Milk

Reduce the chances of infection and protect infants with the Universal Ameda HygieniKit Milk Collection System, the safest kit available on the market. This collection system is easy to use for your hospital or health team, because the Universal Ameda HygieniKit fits every Ameda pump. The Ameda HygieniKit features an independently lab-tested, Airlock Protection barrier that helps protect breast milk, tubing and the pump from potential contaminants like common bacteria and viruses while pumping. Ameda's kit prevents milk and/or moisture from entering tubing — eliminating the risk of dangerous mold growth.

Highlights:

SAFE

Patented barrier to protect breast milk from contamination

EASY TO CLEAN

4 easy-to-clean parts plus the benefit of no routine tubing inspection

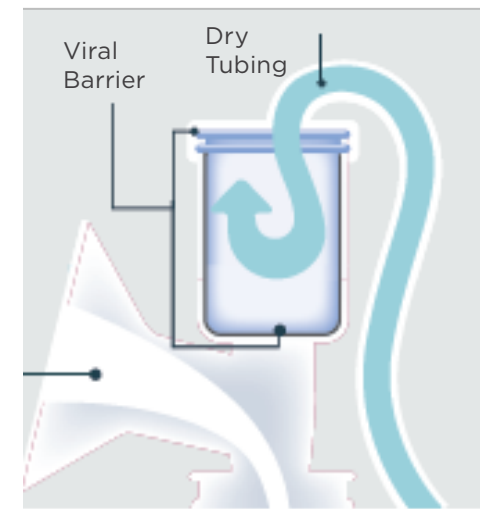

SIMPLE

The Ameda Universal HygieniKit fits all Ameda pumps, which means less inventory to manage

UNIVERSAL

Ameda's universal thread fits all standard bottles

Ameda® Universal HygieniKit: Single Patient Kits

H-Series Kits

These kits are designed for single patient use in the hospital or rental depot setting. Kits are either single or dual and have multiple sizes of flanges to choose from. Converts easily to a manual pump with a One Hand assembly (handle sold separately) for more pumping options. Can be used with all Ameda pumps – Platinum, Pearl, Elite, Mya Joy, Mya Joy PLUS. Pre-assembled sterile kit for single patient use.

Single Kit

Available in sizes: 25mm, 28.5mm, 30.5mm

Ameda® CustomFit™ Flanges

Every mother needs a good breast flange fit for greater comfort and better milk flow. The breast flange is the piece held to your breast during pumping. What determines a breast flange's size is the width of its opening. With a good fit, you should see space around your nipple during pumping as it moves freely in the breast flange's tunnel. With a tight fit, your nipple may rub along the tunnel's sides or move very little. The Ameda CustomFit Flange System makes it easy to find a good flange fit by offering seven sizes that adapt to all Ameda breast pumps and kits. Ameda CustomFit Flanges have been designed to work with any Ameda HygieneKit Milk Collection Kit. Simply transfer the valves and diaphragms to the new, better-fitting breast flange size and you are ready to pump. All flanges have universal threads to fit standard bottles.

Highlights:

7 SIZES

Find the best fit for maximum comfort and milk flow

MAXIMUM MILK PRODUCTION

Nipple moves freely in the flange tunnel

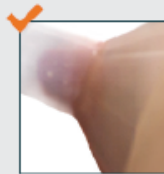

COMFORT

Maintain good suction with no pain

Good Fit

During pumping, your nipple moves freely in the breast flange tunnel. You see space around the nipple. Not much areola is drawn into the tunnel with the nipple.

Too Small

During pumping, some or all of your nipple rubs against the sides of the breast flange tunnel.

Too Large

During pumping, more areola is drawn into the breast flange with your nipple. Your areola may rub against the side of the breast flange tunnel.

Ameda® CustomFit™ Flanges

Flexishield™ Areola Stimulator

Soft, silicone insert fits the standard size (25mm) Ameda breast flange. Reduces flange size to 21mm for maximum effectiveness with smaller nipples. Helps stimulate the let-down reflex. Works with any 25mm breast flange.

Includes: (2) Flexishields

Reducing Insert 22.5mm

Reduces flange size to 22.5mm for maximum effectiveness for smaller nipples. Fits the standard size (25mm) Ameda breast flange.

Includes: (1) Reducing insert

Standard Replacement Flange 25mm (fits manual handle)

Replacement Flange 28.5mm (fits manual handle)

Ameda® Mya™ Joy Plus Personal Use Pumps

The Ameda **Mya Joy Plus** personal use dual electric breast pumps, has 2-phase adjustable hospital strength suction: Stimulation (6 levels) and Expression (12 levels). It is small, lightweight and portable. Mya Joy Plus combines the hospital strength performance moms demand with the incredibly small pump design they need. The thoughtfully designed pump comfortably fits in the palm of a hand and has whisper quiet operation. The Universal HygieniKit included is the same collection kit used for all hospital grade breast pumps.

Highlights:

PORTABLE
Small & lightweight

POWERFUL
Hospital strength performance with two modes of pumping – Stimulation and Expression

QUIET
Operates at less than 45dB and allows for quiet and discreet pumping anywhere

COMFORTABLE
Wide range of suction and speed settings, functions and flange sizes

PROTECT
HygieniKit helps protect breast milk from potential contaminants like bacteria, viruses & mold growth

Ameda® Mya™ Joy PLUS

Hospital Technology at Home

Mya Joy PLUS is the newest member of the Mya Joy personal use pump family. The new Mya Joy PLUS has additional lifestyle features that include a long-lasting rechargeable battery, USB charging cord and convenient wrist lanyard.

Includes:

- Dual HygieniKit Milk Collection System with 25mm and 28.5mm flanges

Ameda® One-Hand Manual Breast Pump

The award winning, ergonomically designed one hand manual pump is a must for the occasional pumper. The best manual pump for comfort and ease of use. Best of all the handle assembly fits on all of the universal kits, so you can convert any of the single patient use HygieniKits to a manual pump.

Highlights:

ERGONOMIC

The ergonomic swivel grip reduces muscle fatigue

MULTI-PHASE

Allows mothers to achieve multi-phase pumping by varying handle squeezes to mimic their baby's nursing rhythm

COMFORTABLE

Can be used with custom flanges for the perfect fit

FLEXIBLE

Works with your Ameda HygieniKit parts to create the easiest possible pumping process

Ameda® CleanEase Microwavable Steam Bags

Ameda CleanEase microwavable steam cleaning bags are a convenient and efficient way to ensure breast pump parts are thoroughly sanitized between uses. Safely sanitize breast pump kit parts such as flanges, flange adapters, diaphragms and valves in minutes. The bags can also be used to sanitize Ameda accessories such as nipple shields, DuoShells, collection bottles, locking rings and lids.

Highlights:

PORTABLE

Carry breast pump kit parts and accessories while on-the-go

MULTIPLE USES

Each bag can be used up to 20 times

SAFE

Leakproof zipper with slider closure for easy hold

LARGE SIZE

Largest sanitization bag available on the market to fit all pump kit parts that need cleaning

QUICK

Provides quick sanitization of breast pump kit, parts and accessories

Available:

- (7) Reusable steam bags
- (100) Reusable steam bags (BULK)

For Health and Safety

Ameda meets the standard recommended by HMBANA and the CDC, per the guidelines "Best Practice for Expressing, Storing and Handling Human Milk in Hospitals, Home and Child Care Setting."

Ameda® Breast Care Nipple Shields

Contact Nipple Shield

Ameda contact nipple shields feature a unique design which allows for increased skin-to-skin contact between mother and baby. They encourage baby's latch onto the breast and protect sore or cracked nipples. Made of ultra-thin flexible silicone, the design has a firmer nipple center to allow for a better grip and softer surround for breast stimulation by the baby. Washable and reusable. Individually packaged, non sterile.

Sizes: 16mm, 20mm, 24mm

Includes: (1) Nipple Shield

Standard Nipple Shield

Flexible shield, for short-term use with guidance of a healthcare professional. Traditional nipple shield shape. Individually packaged, non sterile.

Sizes: 24mm

Includes: (1) Nipple Shield

Mothers Choice Products is proud to offer the largest size range of nipple shields on the market. For more nipple shield options see the Mamivac section.

SteriFeed — The Gold Standard of Bottles

SteriFeed is a world leader in bottle manufacturing and human milk pasteurizers. With a large range of high quality products and dedication to research and development, SteriFeed has become a chosen supplier for hospitals and milk banks worldwide. SteriFeed's disposable bottle range represents the ultimate technology in bottles. They are made from food-grade clarified polypropylene and can be recycled, incinerated or landfilled without any harm to the environment.

The universal threads on the bottles allows them to fit on any standard collection kit. The rigid bottle has a smooth neck for an airtight seal to prevent milk contamination. The bottles are available in multiple sizes. With clearly marked graduations and multiple sizes available, the sterile bottles can be purchased either individually packed in tamper evident bags, or in bulk.

Highlights:

- Guaranteed in stock
- We can offer innovative solutions to drive cost savings
- Exclusive bottles of Canadian milk banks

Product Specifications:

- Airtight & leak resistant for maximum shelf life of breast milk when stored in the refrigerator or freezer
- Clearly marked calibrated and accurate graduations
- Free of Bisphenol-A (BPA), Bisphenol-S (BPS), DEHP, and Phthalates
- Suitable for freezing and pasteurising
- Ready to use. Sterile by manufacturer
- ETO gas is NOT used in sterilization process, per current recommendations
- Available in bulk or wrapped in tamper evident PE bag
- Large size range to meet all hospital requirements: 50ml, 100ml, 130ml, 250ml, 500ml

What SteriFeed Offers:

- 
No Drop Wasted:
Ultra-smooth interior for easy removal of all milk droplets
- 
Multi-Use:
Clear bottles with high quality print makes reading graduations easy
- 
Universal:
Standard universal neck fits the collection kit of all breast pumps
- 
Quality:
Bottles do not crack or shatter when dropped
- 
Easy Feeding:
Bottles are rigid to prevent force feeding

Colostrum 1ml

SteriFeed Colostrum Collectors

Colostrum Collection and Storage Containers 20ml

SteriFeed's 20ml collection container has a sufficiently wide opening to allow each droplet to be caught during hand expression. It can be used as alternative or a complement to a 1ml collector. Its specially curved base enables simple and effective removal of colostrum with a colostrum collector or syringe for feeding. Can also be used as small quantity storage containers, not just for colostrum.

Includes: 50 packs of (2) 20ml Colostrum Containers

Colostrum Collection and Storage Containers 20ml

Breast Milk Prep System with the Oral syringe lid (TL)

Order #: 14102BP
Quantity: 100 / Case

Colostrum Collector 1ml

SteriFeed's 1ml Colostrum Collector is the perfect way to collect each precious drop of hand expressed colostrum. Clear markings allow the user to see the volume collected and each collector comes with a stopper so the colostrum can be safely stored. The plunger has a unique tip to allow the removal of all liquid gold contained in the syringe is extracted. The Colostrum Collector is suitable for labelling and freezing, providing an easy to use option for expression at both antenatal and early postnatal stages.

Includes: 100 units of (1) 1ml Colostrum Collectors

Colostrum Collector 1ml

Milk Prep System

The Milk Prep System is designed to give health care professionals a hygienic and convenient solution to breast milk handling.

When used in combination, the NeoMed Milk Transfer Lid and SteriFeed's 250 mL disposable bottle create a leak-proof connection. The NeoMed transfer lid allows transfer of contents between a storage container and an enteral syringe while promoting aseptic technique.

Includes: 1 SteriFeed Tamper Evident, Sterile, Disposable bottle 250 ml
1 Neomed Milk Transfer Lid , Sterile, Non ENfit, Orange

Breast Milk Prep System with Non Enfit Milk transfer lid. (TL)

Special Order:

Neomed Milk Transfer Lid, Sterile, Non ENfit, Orange (TL)

ENfit compatible Lids (purple PTL-NC or orange TL-NC)

Easing the Transition from Womb to World

Trusted by Hospitals. Driven by Data. Backed by Science.

Joeyband is clinically proven and designed for prolonged skin-to-skin care. Babies held skin-to-skin are proven to have stronger immune systems, are 12x less likely to cry and sleep better and for longer. A bonus is its ability to increase endorphins, which strengthens bonding for all caregivers, including the non-birthing parent.

Joeyband is optimized for NICU, C-Section, Twins, Triplets, and any caregiver of any physical and neuro ability. The Joeyband does more than just snuggle your baby safely; rest assured you're giving baby one of the healthiest starts for growth and development.

Joeyband was created to help decrease the risk of infant falls and to help increase breastfeeding rates by facilitating increased skin-to-skin contact in the immediate post-partum period. Joeyband can help with extended Kangaroo Care in the NICU, which may shorten length of stay and improve patient outcomes.

The Joeyband is not a carrier, and not for co-sleeping (bedsharing). It is for proper skin-to-skin positioning and breastfeeding support.

Ask us for a detailed list of benefits and ROI unique to your institution.

What Joeyband™ Offers:

In the OR:

Immediate Skin-to-Skin for all C-Section Moms

In the NICU:

Facilitates extended Kangaroo Care which helps shorten length of stay and saves money

In Postpartum:

Joeyband helps prevent infant falls

Cost-Effective:

Joeyband can be washed up to 10 times before needing to be replaced

Joeyband™ — Benefits in Practice

- ✓ The Joeyband enables clinicians to conduct safe skin-to-skin practices, when mothers deliver their newborns in hospital.
- ✓ The Joeyband ensures the newborn is physically supported in a safe position.
- ✓ The Joeyband reduces infant falls in the hospital.
- ✓ The Joeyband is in more than 300 hospitals across North America, and used by some of the most reputable facilities in the world.

FOR MOM	FOR BABY	FOR HOSPITAL
Increase in patient satisfaction	Cries less often & deeper REM sleep	Helps reduce NICU admissions (cost savings)
Lower risk of postpartum anxiety & depression	More stable heartbeat and breathing	Eliminates newborn falls
More stable heartbeat and breathing	Soothes baby with deep pressure touch	Supports with staff shortages (cost savings)
Improved breast milk production	Thermoregulation	93% of nurses found that shoulder, neck, and wrist pain previously associated with holding baby in place, was eliminated with the use of Joeyband

Joeyband™ Sizes

Joeyband™ Pro (one size)

A 'one size fits most' model, designed to streamline workflow as no sizing is required prior to use. Expanded adjustability, from 25" to 60" (size 2 through 2X). The same Joeyband Pro can be used by the entire family (mom, dad, grandparents).

Joeyband™

Size A: SM/MED (24'-45")

Size B: LG/XL (39'-60")

Size C: 2XL/3XL (54'-75")

Sizing Rule of Thumb for non-Pro bands:

Size A is for average builds (size 2-16), Size B is for larger size builds (size 12-16), and Size C is the largest size (size 3X and up). If it is being used during a c-section, the belt will be wrapped around the mother's chest so measure accordingly.

Protect Sore or Sensitive Nipples

Mamivac nipple shields are hypo-allergenic and made of thin, tasteless silicone to facilitate latch and comfort while breastfeeding. They come in multiple sizes and shapes to fit all needs. Mamivac nipple shields are for short term use for latch assistance, to help with flat inverted nipples or sore or sensitive nipples. Mamivac has a unique and ergonomic shape designed to keep skin-to-skin contact during breastfeeding.

Conical Shape: 18mm, 20mm, 28mm

The conical shaped shield has straight side walls right to the base. It does not indent down the shaft of the shield's nipple. It is slightly wider at the base of the nipple than the tip.

Cherry Shape: 18mm, 20mm

This shape can be helpful for baby with sucking difficulties such as tongue tie because it is rounded and offers an indent so baby can "catch" onto the nipple.

Mamivac conical nipple shields are available in clinical packs of 50, clean from manufacturer.

Mothers Choice Products is proud to offer the largest size range of nipple shields on the market. For more nipple shield options see the [the Ameda Breast Care Shields section](#).

What Mamivac® Offers:

Unique Shape:

Cherry or Conical nipple shape

Tasteless:

Won't interfere with breastfeeding

Thin:

Facilitates skin-to-skin contact between mom and baby

Durable:

Made of high quality silicone

Pain Relief:

For sore painful nipples

Helping People Feel Better Naturally

For nearly 30 years TensCare has been on the cutting edge for pain management and incontinence therapy. TENS (transcutaneous electrical nerve stimulation) and EMS (electrical muscle stimulation) are ultra safe and easy to use. TensCare has a full range of devices for pain therapy including labour pains and pelvic health.

Perfect mamaTENS for Managing Labour

TensCare has many years experience in providing a modern, safe, drug-free solution for labour pain. The Perfect mamaTENS is approved by Health Canada and recommended by midwives, doulas and health care professionals. Labour TENS machines are designed to help the mom labour at home longer and delay early intervention of other pain management.
